EDUCATION

Bachelor of Engineering (B.E), Computer Science & Engineering, 2022 – 2026
SDM College Of Engineering and Technology
CGPA: 8.97/10 (Till SEM VI)

Senior Secondary (XII), Karnataka State Board, 2020 – 2022
Sanmarg PU Science and Commerce College
Percentage: 86.60%

Secondary (X), Karnataka State Board, 2019 – 2020
Basaveshwar English Medium High School, Gadag
Percentage: 90.08%

Skills

Languages

C, JavaScript, C++, Java (Basic).

Database

MongoDB, MySQL

Web

HTML, CSS, React.js, Tailwind CSS, Node.js, Express.js, REST APIs

Tools

Git & GitHub, Postman, VS Code, Jira

Projects

SecureBin, React, Tailwind CSS, Node.js, Express, MongoDB, AES Encryption

GitHub: [github.com/yourusername/ SecureBin](https://github.com/yourusername/SecureBin) | Live: SecureBin.com

- Built a privacy-focused SecureBin allowing users to share text/code snippets via unique, encrypted links with no authentication required.
- Implemented client-side AES encryption, so even the server can't access paste content. Users decrypt content only through URL fragments.
- Enabled expiration controls - auto-delete after time (10min-1 week) or view-based (e.g., burn after reading).

XeroxShop – Document Upload & Sharing Web App for Xerox/Print Shops,

Tech Stack: React, Tailwind CSS, Node.js, Express.js, MongoDB, Cloudinary, JWT

GitHub: github.com/Shekhar7373/XeroxShop | Live: XeroxShop.com

- Developed a role-based platform for customers to upload documents and shop owners to manage, preview, and print them in a local Xerox/print shop context.
- Implemented JWT-based authentication and role-specific dashboards (Customer / Shop Owner) for secure and segregated access.
- Enabled Cloudinary integration for document storage and previews, supporting PDF and image uploads.

Movie Search Web App, React-based Movie Finder using OMDB API

Tech Stack: React, JavaScript, OMDB API, Tailwind CSS, Netlify | Live: moviesearch.vercel.app

- Developed a responsive movie search application using the OMDB API to fetch and display real-time movie data by title.
- Integrated a dynamic search input with **debounce** to reduce API calls and improve UX.
